(54) Title: ENHANCEMENT OF VIDEO IMAGES BY BOOST OF SECONDARY COLORS

WO 2005/074301 A1

(57) Abstract: A method for enhancing a video image by processing a video signal includes inputting a video signal and boosting color saturation or lightness of the video signal as its hue gets closer to a secondary color, and/or shifting the hue of the video signal toward one or more secondary colors. This produces an enhancement of secondary color representation, for example by boosting cyan and yellow colors while not boosting primary colors.
